

Entry to Exit – the succession planning conversation

Presenter: Richard Adamson

From Graduation to Retirement there are a couple of constants within General Practice. Time is precious and patients come first. BNZ have established a nationwide team who understand the Health Sector and are acutely aware that normal banking hours nor standard solutions are often appropriate.

It is important to put some time aside to plan for your financial future. During this session I will help explain how your finance provider can be your Partner and also provide you with some of the knowledge to:

- Purchase a shareholding in an existing practice
- Establishing a new practice – risks and rewards
- Position your existing practice for sale

I will also provide a general update on what we are seeing through the country with regard to the General Practice market.
